

LPAD REMOTE VOLUME CONTROL

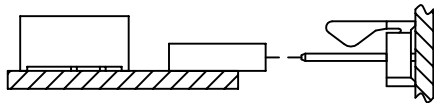

JOB# _____

In-field replacement of old remote pot design.

1 - Connect an 8-ohm speaker and the LPAD remote volume control to J2 of the C.E. Electronics 3541 voice board as shown below.

2 - Set the voice board volume pot for 3/4 of max. volume.

3 - Use the LPAD to set the desired volume level.

If the LPAD is a replacement for a voice board with an MTA connector instead of a volume pot, connect the LPAD as shown at right and replace the old remote volume pot with the CE3808 board as shown above:
