

Max

Elevator Displays

7.0" H/V (16:9) | 9.0" H/V (16:9) | 10.4" H/V (4:3)

The MAX is a new elevator display based on the C.E. Mini PI series. These screens are not only sharper and crisper, but have unsurpassed viewing angles.

The MAX stands out above all other elevator displays by being the most flexible position indicator available. It allows the representation of much more than just an elevator position. It's a multi-function unit designed to display both custom graphics and text, such as advertisements, tenant or building information and text-based messages.

The display works directly from elevator signals to prompt information. The units can be updated via a USB stick.
